

Registration No.: _____

IMPORTANT NOTE

- 1) This sample paper serves solely as a visual representation of the question paper.
- 2) Each question in the question paper will be mapped with corresponding Course Outcome(s) (CO) and Revised Bloom's Taxonomy (RBT) Level.
- 3) Students should refer to the latest course syllabus and question paper pattern for exam preparation.
- 4) The final version of the End Term Examination question paper may differ in terms of layout, design, and content. This sample paper should be viewed for reference purpose only and not as final/official question paper.

Course Code: CSE274

Course Title: APPLIED MACHINE LEARNING

Time Allowed: 3 hrs

Max. Marks: 70

Read the following instructions carefully before attempting the question paper.

1. Match the Paper Code shaded on the OMR Sheet with the Paper code mentioned on the question paper and ensure that both are the same.
2. This question paper is divided into two parts A and B.
3. Part A contains 30 questions of 1 mark each. 0.25 marks will be deducted for each wrong answer.
4. Part B contains 5 questions of 10 marks each. Attempt any 4 questions out of these 5 questions. In case all the 5 questions are attempted then only the first four attempted questions will be evaluated.
5. Attempt all the questions in serial order.
6. Do not write or mark anything on the question paper except your registration no. on the designated space.
7. After completion of first 90 minutes, the OMR sheet will be taken by the invigilator.
8. Submit the question paper and the rough sheet(s) along with the answer sheet to the invigilator before leaving the examination hall.

Part – A

Part A contains 30 objective type questions of 1 marks each

Sample objective type question is given below:

Sample Question: Which resampling technique creates synthetic samples by interpolating between existing minority class samples?

- (a) Random Oversampling
- (b) SMOTE
- (c) Random Undersampling
- (d) Tomek Links

[CO1,L2]

Part – B

Part B contains 5 Long answer questions of 10 marks each

Sample Long answer question is given below:

Sample Question: Describe the concept of data leakage in machine learning and explain the situations in which it can occur, including the use of test data during training, using external information not present in the training dataset, and including features that are not available at prediction time.
